

- **Emtree 2025.03 release notes**

General improvements

Developments around COVID 19 / SARS COV II respectively are no longer a strong focus but are still being monitored and added to the taxonomy.

Diseases

Updated Oral potentially malignant disorders aligning with latest classification.

As a part of on-going taxonomy improvement of congenital and genetic disorders, we have created an autosomal dominant neurologic disorders branch for this release, while an autosomal recessive neurologic disorders branch will be implemented upon next release. The rationale behind it is to create a neurologic disease branch based on genetic abnormalities.

The geriatric disease branch has been updated with minor changes to be also implemented on the next release.

With a focus on customer queries and feedback we have new updates on chromosomal and rare diseases on the pipeline, along with a major update that involves tissue degeneration and regeneration.

In total, 10 new concepts have been added.

Drugs and chemicals

Updates regarding all routinely monitored sources were provided.

- The United States Adopted Names published from March 2025 until June 2025 (included) were incorporated.
- Names of newly approved drugs, drugs under consideration, orphan drug designations and drug trade names as published by the FDA, EMA and MHRA in the period February 2025 - May 2025 (included) were incorporated.
- No new lists of proposed INNs were published by the WHO during the editing phase of this release.

In total, 57 new concepts have been added.

Medical devices

- 88 new alternative labels have been added to the medical device branch of Emtree.
- Of these 88 new alternative labels 87 are new device trade names. Most of these device trade names were sourced directly from their corresponding manufacturers. This is an ongoing effort and will be continued in future releases.
 - These also include FDA's recently approved devices until the date of Emtree editorial freeze.

- One new concept has been added to the medical device branch of Emtree.
 - New concept 'urology software' was added to the branch 'biomedical software'.

Organisms

As part of the monitoring of organisms 1 Monkeypox virus isolate and 9 SARS-CoV-2 strains were. In total 74 new terms and 15 new organisms were added to the taxonomy.
