

# Meet the new Reaxys®!

## What's changed?

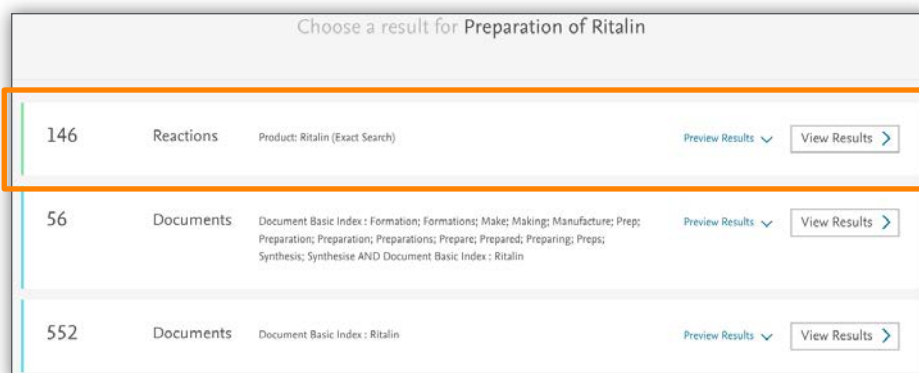

Reaxys is even easier to use—even beginners can quickly construct powerful searches that retrieve relevant chemistry answers.

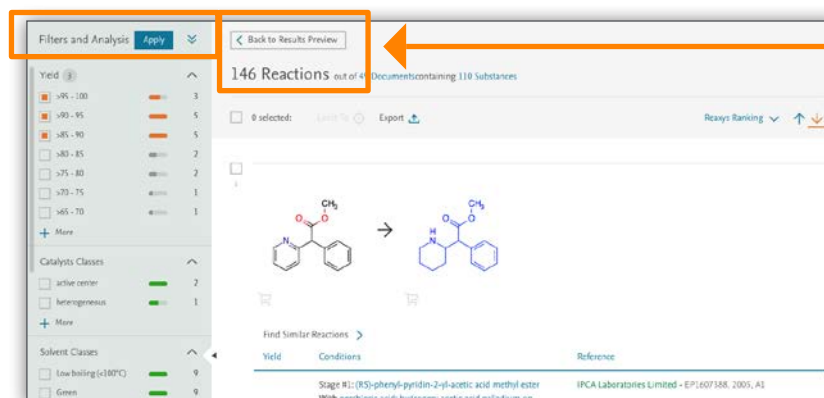

Streamlined Quick Search that combines keyword and structure input—no special knowledge of database structure or search algorithms required

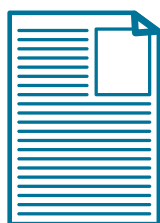

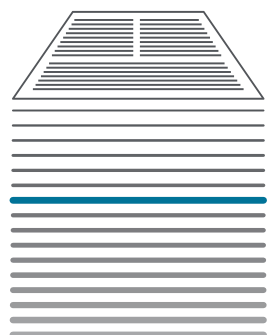

Drag-and-drop Query Builder provides all the advanced search features in one place

Result previews to help see all of the options—including ones users might otherwise have missed

Options to filter and process results to get to the relevant answers faster—designed in consultation with research chemists

Easy-to-use literature search function for rapid retrieval of relevant articles, patents, conference abstracts and textbook chapters

>15,000 chemistry-related periodicals indexed for greater compound, citation and literature discoverability

Best-in-class discoverability of compound property and reaction data from the full-text of chemistry literature—get relevant answers sooner

Compounds excerpted from the full-text of patents from Asian offices—unique information that doesn't appear in world patents

**+350 thousand  
compounds  
in 2016**

Go to <https://new.reaxys.com> and see how the new Reaxys puts you on the shortest path to relevant chemistry answers.
