Test 'A'

1. Start a ScienceDirect session in your proxy

2. Make a URL combining your proxy's ScienceDirect hostname and the following path to a ScienceDirect article:
   /science/article/pii/S2352618117300483

   The resulting URL should look similar to:
   ...

   where myproxy.domain.edu is the hostname of your proxy.

3. Navigate to the article page using that URL

   You should land on the article page:

   ![Article Page Screenshot]

4. Click the Sign In header at the top right corner of the article page:

   ![Sign In Button Screenshot]

5. Check the URL in the address bar. It should look similar to:
   (note the '-' in www-sciencedirect-com)
6. Check that the Sign In page looks ok:

![ScienceDirect Sign In Page](image)

7. Sign in using your Elsevier Account. If you do not have an account, please create one using the 'Create an account' link on the Sign In screen.

8. You should be redirected to the ScienceDirect homepage on Sign in.

**Test 'B'**

1. While still signed in and on your institution's proxy, navigate back to the article using the URL you created in Test A

2. Scroll down to the end of the article and click on the first ‘Article’ link in the references section:

   “Food as a marker for economy and part of identity: traditional vegetal food of Yezidis and Kurds in Armenia”
3. Check the URL in the address bar. It should look similar to:

http://www.sciedirect.com.myporxoy.domain.edu/science/article/pii/S2352618116000044

4. Scroll to the bottom of the page and click on 'Contact and support':

5. You should drop out of your institution’s proxy and land on the following page:
6. Check the URL in the address bar. It should look like this:
https://service.elsevier.com/app/contact/supporthub/sciencedirect/

Test 'C'

1. Sign out:

2. Take the article URL you created in Test A and modify it for https:
https://www-sciencedirect-com.myproxy.domain.edu/science/article/pii/S2352618117300483

3. Navigate to that URL and check the article page for problems:
   a) Can you access the page?
   b) Do the images, recommended articles, and references look ok?
4. Scroll down to the end of the article and click the first article reference:

"Food as a marker for economy and part of identity: traditional vegetal food of Yezidis and Kurds in Armenia"

You should end up on the reference article's page:
5. Click the ScienceDirect logo at the top left of the page.

You should end up on the ScienceDirect home page. Please note, this will revert to 'http'

6. Navigate back to the “Food as a marker...” article page. Click the 'Download PDF' link at the top of the page.

a) Does the PDF come through?
   Please note: after the PDF comes through, the link in the address bar will be 'http' not 'https'

---
