Date: 06.06.2018

## Embase June Release – Focusing On Export and Error Messages

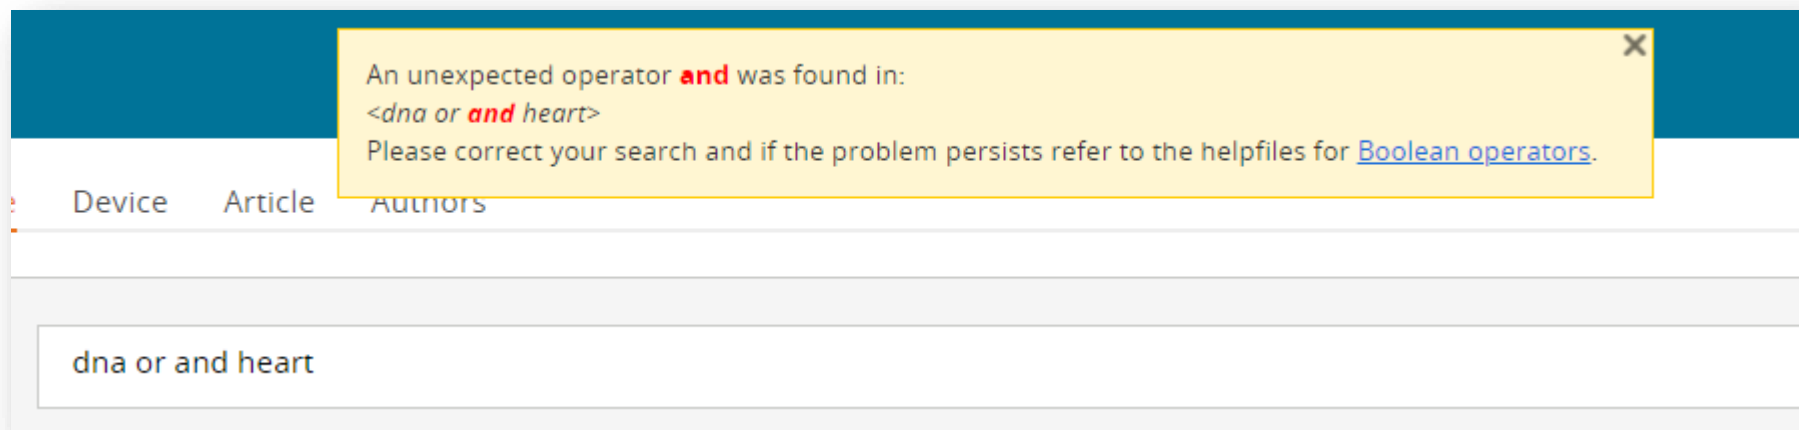

- Introducing a more intuitive “Error Message” for parsing incorrect queries
- Continuous enhancement of export functionality
  - New layout of the export pop-up
  - New Excel export format with “Fields by Column” and “Fields by Row”
  - Introducing new fields in all formats
  - Changing the format of listing author names and Emtree terms in Word document
  - Addition of Open URL Link in all export formats

## More intuitive “Error Messages” for parsing incorrect queries

The **intuitive Error/Warning Messages** allow you to pinpoint the syntax mistakes in the queries. The highlighting includes:

- unclosed parenthesis or quotes
- faulty codes

Error messages will now not close automatically after 5 seconds but users need to close them actively.
