

Emtree Terms Added and Changed (January 2018)

This is an overview of new terms added and changes made in the first Emtree release in 2018.

Overall, Emtree shows a net growth of 1,308 preferred terms (250 drug terms and 1,058 non-drug terms) compared with the previous version released in September 2017. In total Emtree now counts 79,984 preferred terms.

Because the terms added include replacements for existing preferred terms (which become synonyms of the new terms) as well as completely new concepts, the number of terms added exceeds the net growth in Emtree. Other changes could include the merging of two or more existing preferred terms into a single concept.

The terms added and changed are summarized below and specified in detail on the following pages.

Emtree Terms Added in January 2018

1,397 new terms (including 88 replacement terms and promoted synonyms) have been added to Emtree as preferred terms in version January 2018 (compared to September 2017):

- 295 drug terms (terms assigned to the Chemicals and Drugs facet).
- 1,102 non-drug terms (terms not assigned as Chemicals and Drugs).

The new terms (including the replacement terms and the promoted synonyms) are listed as *Terms Added* on the following pages. Note that many of these terms will have been indexed prior to 2018 (typically as candidate terms), sometimes for several years, before they were added to Emtree.

Emtree Terms Changed in January 2018

88 terms (46 drug terms and 42 non-drug terms) from Emtree September 2017 have been replaced by 85 different terms in January 2018 (45 drug terms and 40 non-drug terms).

Of these, 78 terms (43 drug terms and 35 non-drug terms) are new (e.g. new generic names for drug chemical names) and have been assigned creation date 2018; the remaining 7 replacement terms (2 drug terms and 5 non-drug terms) were already present in Emtree.

No drug terms were replaced by a non-drug term, 1 non-drug term was replaced by a drug term. No preferred terms were deleted.

Changes are presented in alphabetical order of the *new* terms.
