

Accessibility Remediation Plan

 Q3 2026	 Q4 2026	 Q1 2027
• 1.3.2 Meaningful Sequence - Advanced Search instructions now precede related inputs for screen-reader users. • 1.4.13 Content on Hover or Focus - Remediated. • 3.2.1 On Focus - View All and See Other Editions dialog focus behavior remediated. • 3.2.2 On Input - Advanced Search focus management remediated.	• 1.3.1: Advanced Search heading and dialog semantics. • 2.4.3: Search Filters View All modal sorting focus order. • 4.1.2: Advanced Search button, View All sorting controls, and View All/search-results pagination controls. • Responsive presentation: 1.4.10 (2) and 1.4.4 (1).	• Keyboard and focus: 2.4.3 (7), 2.1.1 (2), and 2.4.1 (2). • Semantics and control information: 4.1.2 (14) and 1.3.1 (3). • Remaining visual/status issues: 1.4.11 (1) and 4.1.3 (1).
DELIVERY APPROACH		
Work is sequenced by user impact: keyboard and screen-reader access first, followed by semantic and control information, responsive presentation, and visual or status-message issues. Each release is followed by targeted regression testing and evidence updates.		
SCOPE NOTE		
This roadmap covers Partially Supported issues identified in the May 2026 VPAT review. It does not imply that every third-party publisher asset, or document has been assessed or remediated. Accessible-format requests may remain necessary for some third-party content.
