Set Up ClinicalKey Student in your Learning Management System FOR CANVAS
Apps can be set up at different levels on Canvas. This aid shows you how to set up the external ClinicalKey Student app at both the Account level and the Course level.

Note: if your institution will be using ClinicalKey Student in multiple courses and you don’t want to manually set up ClinicalKey Student app in each course, it is recommended you follow the External App Setup at the Account Level section.

Contents

1. External App Setup at the Account Level .............................................................. 2
2. External App Setup at the Course Level ............................................................... 6
1. External App Set up at the Account Level

1.1. Log in as an administrator into your Canvas system.

1.2. Click on the Admin tab.
1.3. Select the institution account at which the courses that need access to the tool are located.

1.4. Click on **Settings**.

1.5. Click on the **Apps** tab.

1.6. Click the **View App Configurations** button.
1.7. Click the **+App** button.

1.8. Select the **Configuration Type** drop-down menu – choose ‘Manual Entry’ for the dropdown which is the option by default.
1.9. Enter the following information into the app:

- **Name**: ClinicalKey Student
- **Consumer Key**: [Enter Key here]
- **Shared Secret**: [Enter Secret here]
- **Launch URL**: https://authgateway.elsevier.com/tools/meded

1.10. Click the **Submit** button.
2. External App Set up at the Course Level

Apps can be set up at different levels on Canvas. Setting the app up at the course level will enable only that specific course to have access to the app.

Note: If you already set up the app at the account level, you do not need to do so again at the course level.

2.1. Log in as an administrator or an instructor into your Canvas system.

2.2. Open the course into which you want to add the Clinicalkey Link app.

2.3. Click the Settings option.
2.4. Click the **Apps** tab.

2.5. Click the **View App Configurations** button.

2.6. Click the **+App** button.

2.7. Select ‘Manual Entry’ in the **Configuration Type** drop-down menu – ‘Manual Entry’ is the option by default.
2.8. Enter the following information into the app:

- **Name**: ClinicalKey Student
- **Consumer Key**: [Enter Key here]
- **Shared Secret**: [Enter Secret here]
- **Launch URL**: https://authgateway.elsevier.com/tools/meded

2.9. Click the **Submit** button.
