User friendly 'Alert history' & 'Journal' page

1. Managing alerts made easy in the Alert history page

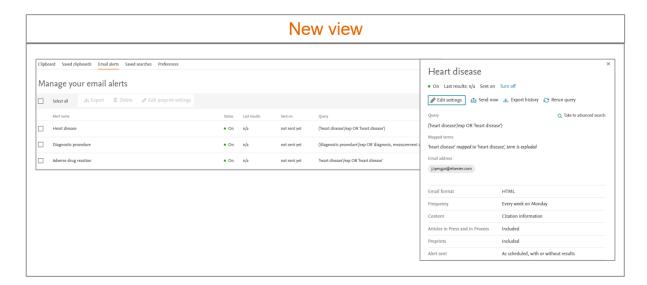

We have designed a user friendly alert history page which provides user an overview of the available alerts in their 'Email alerts' section.

Following information is available to the users in the Email alerts page -

- 1. Alert name Name of the created alert
- 2. Status of the alert 'On' for the active alerts and 'Off' for the deactive alerts
- 3. Last results number of results sent in the last email alerts. If results sent > 0, the user on clicking on the last results will be directed to the results page running a search which produced the last results sent.
- 4. Sent on Date when the last alert was sent
- 5. Query The search query of the created alert

To review more details of the alert, please click on the alert of interest. The alert details panel will appear on the right side of the screen. All the actionable buttons to modify the alert are moved to the 'Alert details' panel.

- 1. Turn off Clicking on this will deactivate the selected alert
- 2. Turn on Clicking on this will activate the selected alert
- 3. Send now Results since the alert was last run until now will be sent to all email addresses specified in the settings of the selected alert. Using this feature does not affect the sending of the scheduled alerts.
- 4. Export history Retrieve details of all the changes made to the created alert.

 The exported csv contains 'Alert name', 'Event' (help track modification to the alert),

 Date and time (GMT) when the event occurred, 'Search query', 'Records included',

 'Frequency', 'Receipient' and 'Status'
- 5. Rerun query The query wil run in Embase and you will be taken to the Results screen
- 6. Edit settings Will open the 'Edit email alert' window and allow you to edit all options you gave in when creating the alert

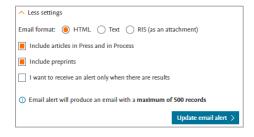

Take to advanced search – Will copy your query to the Advanced Search page where you can edit and rerun your search

Edit Alert Window

We have updated the edit alert window to showcase the most important settings at the top and the advance settings can be reviewed by clicking on 'More settings' option.

More advanced settings

Field name	Function		
Alert name	This will be the name featured in the email alerts list and the subject of the email alerts.		
Comments (optional)	Enter more details about the alert (e.g. Project name, paper title you set the alert for)		
Email address(es)	 Enter the email address for alert notifications. This field automatically displays the email address entered when you first registered to use Embase. You can also enter email addresses of colleagues. 		
Frequency	 every day, every week, every two weeks, every month, every two months, every three months, every six months, or every year. For weekly alerts, you may choose the day of the week for the alert. For monthly alerts you may choose the day of the month for the alert. For yearly alerts, you may choose the month and the day of the month for the alert 		
Content selection	 Citations only: For Citations Only, the limit is 500 records in your inbox. If your search has produced more than 500 records, you may follow a link to view the rest of your results in Embase. Citations and abstracts: The first 25 results will be sent to you by email and again, you may follow the link provided to see the rest of the records in Embase. Citations and index terms Citations, abstracts and index terms Full record (All available content) 		
Email format	Select the format of your alert email: HTML Text RIS (as attachment): Choose the RIS format if using Reference Manager, ProCite, EndNote as your bibliographic management software.		
Include articles in Press and in Process	Tick this box to also include Articles in press and in process to your search results.		
Include preprints	Tick this box to also include preprints to your search results.		
I want to receive alerts only when there are results	Tick this box if you'd only like to receive alerts when there are results for your search.		

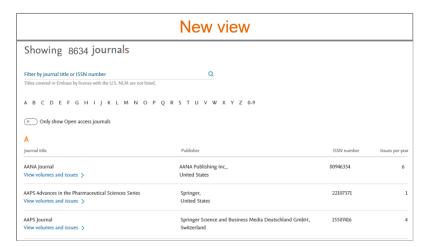

2. Easily find all the Journal covered by Embase

You can view our new and improved Journal page, by clicking on the 'Journals' in the top bar of any page. These journals are sorted alphabetically. It includes all the indexed journals in Embase. This journal list will be updated 3 times a year.

Note: There may be Journals which were supported in the past and have now been deactivated, since we still have indexed content from the past it will be available in the Journal list.

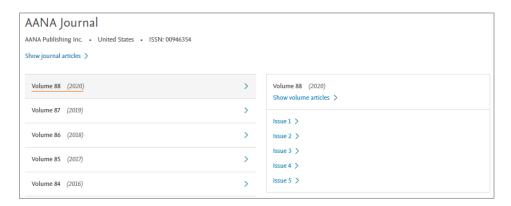

New functionalities -

- Search box To find a journal of interest you can use the search box at the top of the
 page by entering the Journal title or the ISSN. To filter the results you can also pre
 select the starting alphabet or the digit of the Journal title below the search box.
- Only show Open access journals displays Open access journals
- View volumes and issues For more information on the journal click on this option

Volumes and issue page

All the volumes are displayed in the descending order, with the most recent ones at the top and the old ones at the bottom. Clicking on volume will show the list of the issues.

Additional functionalities -

- 1. Show journal articles User will be directed to the Results page, the search will retrieve all records associated to the selected journal.
 - For eg For the journal AANA Journal, clicking on the link will execute the following search
 - '00946354':is OR 'aana journal'/jt
- 2. Show volume articles User will be directed to the Results page, the search will retrieve all records associated to the selected journal and volume.
 - For eg For the journal AANA Journal, clicking on the link will execute the following search
 - ('00946354':is OR 'aana journal'/jt) AND '88':vi AND '2020':py
- 3. Issue # User will be directed to the Results page, the search will retrieve all records associated to the selected journal, volume and issue.
 - For eg For the journal AANA Journal, clicking on the link will execute the following search
 - ('00946354':is OR 'aana journal'/jt) AND '88':vi AND '2020':py AND '1':ip

3. Standardize searching of dates in Embase

In order to standardize searching by date we have extended support for multiple date format searching.

Following table provides information of the additional date format supported for searching per date field

Format supported	Loaded date (:ld)	Conference date (:dc)	Publication date (:pd)
dd-mm-yyyy (e.g)	'20-10-2020':ld	'20-10-2020':dc	'20-10-2020':pd
уууу-mm-dd (e.g)	'2020-10-20':ld	'2020-10-20':dc	'2020-10-20':pd
mm-yyyy (e.g) New	'10-2020':ld	'10-2020':dc	'10-2020':pd
уууу-mm (e.g) New	'2020-10':ld	'2020-10':dc	'2020-10':pd
YYYY (e.g) New	'2020-10':ld	'2020-10':dc	'2020-10':pd
Range - [dd-mm-yyyy TO dd- mm-yyyy] (e.g) <i>New</i>	[01-01-2020 to 31-12-2020]/ld	[01-01-2020 to 31-12-2020]/dc	[01-01-2020 to 31-12- 2020]/pd
Range - [yyyy-mm-dd TO yyyy-mm-dd] (e.g) New	[2020-01-01 to 2020-12-31]/ld	[2020-01-01 to 2020-12-31]/dc	[2020-01-01 to 2020-12- 31]/pd

Bugs fixed

- 1. Users able to create an email alert from saved searches
- 2. Highlighting of keywords to be available in the exported file (PDF/Word)
