INTRODUCTION

Geofacets for ArcGIS makes exploration seamless by allowing the content and insights from Geofacets (www.geofacets.com) to be accessible from within the ArcGIS software platform.

*Geofacets for ArcGIS* integrates the unique features and functionality of Geofacets directly into ArcGIS. This allows geoscientists working in exploration to search, discover and integrate millions of scientific maps, tables, photos, x-sections and seismic extracted from peer-reviewed publications into 2D and 3D projects within the ArcGIS platform, enabling easier validation of proprietary models with external insights, the ability to learn more about the geologic characteristics of an area, and more.

**Geofacets for ArcGIS delivers:**

- Trusted, curated content base with hundreds of thousands of georeferenced geologic maps, tables, photos, x-sections and seismic sourced from over 100+ leading scientific journals and publications in one platform, updated weekly
- Geographic and keyword-based search features that are developed specifically to help geoscientists find relevant content quickly and effectively!
- Comprehensive document details and links to associated full-text articles that provide additional insight and context for individual maps
- Ability to save searches and set up alerts that make it easier to stay up-to-date with the most recent published maps and information available

**Do more in less time by:**

- Gaining greater scientific insights for deeper analysis of exploration opportunities
- Reducing risk by increasing certainty in your interpretations
- Supporting your evaluations and recommendations when you have little or no proprietary data and information
- Spending less time searching and formatting, and more time on interpretation

Accelerate your exploration workflow with Geofacets and *Geofacets for ArcGIS.*
ADDITIONAL INFORMATION AND RESOURCES
This installation guide provides information about downloading and installing both the ArcMap and ArcGIS Pro add-in.

For additional information about the Geofacets Connector, please visit: https://service.elsevier.com/app/home/supporthub/geofacets/

PRODUCT LICENSE INFO AND DETAILS
Access and use of Geofacets for ArcGIS requires both user registration and a license or subscription to Geofacets. This installation guide provides information about downloading and installing, as well as registration.

PRODUCT SUPPORT
If you have problems installing Geofacets for ArcGIS, please contact the following email support box: Geofacets-help@elsevier.com

HARDWARE, SOFTWARE AND SYSTEM REQUIREMENTS
To install and run the plug-in, you will require:

• Installation of ArcMap or ArcGIS Pro (see release notes for supported versions)
• Identical hardware, software, operating system requirements to run ArcGIS (e.g., versions of Windows, .NET etc.)
• Valid license and subscription for Geofacets
• Registration name and password for Geofacets (www.geofacets.com)
• 1GB free disk space (if stored locally) or network space for saving Geofacets indices

INSTALLING Geofacets for ArcGIS
Before starting the installation process for Geofacets for ArcGIS, please make sure that the appropriate version of ArcMap or ArcGIS Pro is running on your computer.

Geofacets for ArcGIS requires a valid Geofacets subscription. If you do not have a subscription, please contact us at Geofacets-help@elsevier.com.
INSTALLATION OF Geofacets for ArcGIS

To get started using the Geofacets for ArcGIS, please follow the installation instructions provided below:

1. On a target PC that meets the prerequisites (Visit http://desktop.arcgis.com/en/system-requirements/latest/arcgis-desktop-system-requirements.htm), the installation process can start at Step 3; otherwise Step 1 must be completed before the plug-in is installed.

2. Install the ArcGIS or ArcGIS Pro application.

3. Double click the Geofacets.Installer.ArcMap.msi or Geofacets.Installer.AGP.msi in Windows Explorer from your selected download location.

4. Click the next button on the “Welcome to the Geofacets plugin Setup Wizard.”

5. Click the next button on the “select destination.”

6. Click Install on the “Ready to install Geofacets plugin x.x for ArcMap or (ArcPro).”

   **NOTE:** You may receive a popup box asking to allow Elsevier to install application, Click YES.

7. Click Finish on the “Completed the Geofacets plugin x.x for ArcMap or (ArcPro)” installation.

8. Installation is now complete.
Welcome to the Geofacets plugin Setup Wizard

The Setup Wizard will install Geofacets plugin 1.1 for ArcMap on your computer. Click Next to continue or Cancel to exit the Setup Wizard.

Destination Folder
Select destination folder and click Next

Install Geofacets plugin 1.1 for ArcMap to:

C:\Program Files (x86)\Elsevier\Geofacets plugin

Ready to Install Geofacets plugin 1.1 for ArcMap

Click Install to begin the installation. Click Back to review or change any of your installation settings. Click Cancel to exit the wizard.

Completed the Geofacets plugin 1.1 for ArcMap Setup Wizard

Click the Finish button to exit the Setup Wizard.
VALIDATING THE PLUG-IN WAS INSTALLED SUCCESSFULLY

The following section describes the procedure for checking that Geofacets for ArcGIS has been successfully installed. ArcMap and ArcGIS Pro have separate workflows.

1. **ArcMap** Installation validation

   **Validation option 1**: Open ArcMap, right click in the gray area of the ArcMap toolbar, look for "ArcGIS Plugin."

   **Validation option 2**: Open Windows Explorer, go to C:\Program Files (x86)\Elsevier \Geofacets plugin and check to see if the folder is populated.

2. **ArcGIS Pro** Installation validation

   **Validation option 1**: Open ArcGIS Pro, there will be a new tab in the right side of the toolbar named "GEOFACETS."

   **Validation option 2**: Open Windows Explorer, go to C:\Program Files\Elsevier\Geofacets plugin and check to see if the folder is populated.

Note: Please recheck installation from control panel if you install both the ArcMap and ArcPro for Geofacets plugin.
