

Emtree Terms Added and Changed (January 2014)

This is an overview of new terms added and changes made in the first Emtree release in 2014.

Overall, Emtree has grown by 1772 preferred terms (139 drug terms and 1633 non-drug terms) compared with the previous version released in September 2013. In total Emtree now counts 68,671 preferred terms.

Because the terms added include replacements for existing preferred terms (which become synonyms of the new terms) as well as completely new concepts, the number of terms added exceeds the net growth in Emtree. Other changes include the merging of two or more existing preferred terms into a single concept.

The terms added and changed are summarized below and specified in detail on the following pages.

Emtree Terms Added in January 2014

1828 new terms (including 55 replacement terms and promoted synonyms) have been added to Emtree as preferred terms in version January 2014 (compared to September 2013):

- 148 drug terms (terms assigned to the Chemicals and Drugs facet).
- 1680 non-drug terms (terms not assigned as Chemicals and Drugs).

The new terms (including the replacement terms and the promoted synonyms) are listed as *Terms Added* on the following pages. Note that many of these terms will have been indexed prior to 2014 (typically as candidate terms), sometimes for several years, before they were added to Emtree.

Emtree Terms Changed in January 2014

55 terms (9 drug terms and 46 non-drug terms) from Emtree September 2013 have been replaced by 55 different terms in January 2014.

Of these, 26 are new (e.g. new generic names for drug chemical names) and have been assigned creation date 2014; the remaining 29 replacement terms were already present in Emtree.

No drug terms were replaced by a non-drug term, and no non-drug terms were replaced by a drug term. One (unused) preferred term has been deleted.

Changes are presented in alphabetical order of the *new* terms.
