

Emtree Terms Added and Changed (May 2013)

This is an overview of new terms added and changes made in the second Emtree release in 2013.

Overall, Emtree has grown by 1,585 preferred terms (77 drug terms and 1508 non-drug terms, including 1153 new terms for medical devices) compared with the previous version released in January 2013. In total Emtree now counts 66,179 preferred terms.

Because the terms added include replacements for existing preferred terms (which become synonyms of the new terms) as well as completely new concepts, the number of terms added exceeds the net growth in Emtree. Other changes include the merging of two or more existing preferred terms into a single concept.

The terms added and changed are summarized below and specified in detail on the following pages.

Emtree Terms Added in May 2013

1,686 new terms (including 91 replacement terms) have been added to Emtree as preferred terms in version May 2013 (compared to January 2013):

- 88 drug terms (terms assigned to the Chemicals and Drugs facet).
- 1598 non-drug terms (terms not assigned as Chemicals and Drugs).

These terms are listed as *Terms Added* on the following pages. Note that many of these terms will have been indexed prior to 2013 (typically as candidate terms), sometimes for several years, before they were added to Emtree.

Emtree Terms Changed in May 2013

91 terms (4 drug terms and 87 non-drug terms) from Emtree January 2013 have been replaced by 84 different terms in May 2013. Of these, 59 are new (e.g. new generic names for drug chemical names) and have been assigned creation date 2013; the remaining 25 replacement terms (all non-drug terms) were already present in Emtree.

No drug terms were replaced by a non-drug term, and no non-drug terms were replaced by a drug term.

Changes are presented in alphabetical order of the *new* terms.

Medical Devices

The expansion of the *devices* branch of Emtree (with *medical device* as a key subfacet) has continued in this release, with 1153 new preferred terms. The number of medical device synonyms has increased by 799.
