

## **Emtree Terms Added and Changed (May 2014)**

This is an overview of new terms added and changes made in the second Emtree release in 2014.

Overall, Emtree has grown by 720 preferred terms (87 drug terms and 633 non-drug terms) compared with the previous version released in January 2014. In total Emtree now counts 69,391 preferred terms.

Because the terms added include replacements for existing preferred terms (which become synonyms of the new terms) as well as completely new concepts, the number of terms added exceeds the net growth in Emtree. Other changes could include the merging of two or more existing preferred terms into a single concept.

The terms added and changed are summarized below and specified in detail on the following pages.

### **Emtree Terms Added in May 2014**

786 new terms (including 66 replacement terms and promoted synonyms) have been added to Emtree as preferred terms in version May 2014 (compared to January 2014):

- 104 drug terms (terms assigned to the Chemicals and Drugs facet).
- 682 non-drug terms (terms not assigned as Chemicals and Drugs).

The new terms (including the replacement terms and the promoted synonyms) are listed as *Terms Added* on the following pages. Note that many of these terms will have been indexed prior to 2014 (typically as candidate terms), sometimes for several years, before they were added to Emtree.

### **Emtree Terms Changed in May 2014**

66 terms (17 drug terms and 49 non-drug terms) from Emtree January 2014 have been replaced by 66 different terms in January 2014.

Of these, 56 are new (e.g. new generic names for drug chemical names) and have been assigned creation date 2014; the remaining 10 replacement terms were already present in Emtree.

No drug terms were replaced by a non-drug term, no non-drug terms were replaced by a drug term.

Changes are presented in alphabetical order of the *new* terms.
