

## **Emtree Terms Added and Changed (September 2013)**

This is an overview of new terms added and changes made in the third Emtree release in 2013.

Overall, Emtree has grown by 720 preferred terms (152 drug terms and 568 non-drug terms) compared with the previous version released in May 2013. In total Emtree now counts 66,899 preferred terms.

Because the terms added include replacements for existing preferred terms (which become synonyms of the new terms) as well as completely new concepts, the number of terms added exceeds the net growth in Emtree. Other changes include the merging of two or more existing preferred terms into a single concept.

The terms added and changed are summarized below and specified in detail on the following pages.

### **Emtree Terms Added in September 2013**

747 new terms (including 27 replacement terms and promoted synonyms) have been added to Emtree as preferred terms in version September 2013 (compared to May 2013):

- 173 drug terms (terms assigned to the Chemicals and Drugs facet).
- 574 non-drug terms (terms not assigned as Chemicals and Drugs).

The new terms (including the replacement terms and the promoted synonyms) are listed as *Terms Added* on the following pages. Note that many of these terms will have been indexed prior to 2013 (typically as candidate terms), sometimes for several years, before they were added to Emtree.

### **Emtree Terms Changed in September 2013**

27 terms (22 drug terms and 5 non-drug terms) from Emtree May 2013 have been replaced by 26 different terms in September 2013.

Of these, 8 are new (e.g. new generic names for drug chemical names) and have been assigned creation date 2013; the remaining 18 replacement terms were already present in Emtree.

No drug terms were replaced by a non-drug term, one non-drug term (antibiotic bone cement) was changed into a drug term. No preferred terms were deleted.

Changes are presented in alphabetical order of the *new* terms.
