

Emtree Terms Added and Changed (September 2014)

This is an overview of new terms added and changes made in the third Emtree release in 2014.

Overall, Emtree has grown by 767 preferred terms (123 drug terms and 644 non-drug terms) compared with the previous version released in May 2014. In total Emtree now counts 70,158 preferred terms.

Because the terms added include replacements for existing preferred terms (which become synonyms of the new terms) as well as completely new concepts, the number of terms added exceeds the net growth in Emtree. Other changes could include the merging of two or more existing preferred terms into a single concept.

The terms added and changed are summarized below and specified in detail on the following pages.

Emtree Terms Added in September 2014

811 new terms (including 44 replacement terms and promoted synonyms) have been added to Emtree as preferred terms in version September 2014 (compared to May 2014):

- 150 drug terms (terms assigned to the Chemicals and Drugs facet).
- 661 non-drug terms (terms not assigned as Chemicals and Drugs).

The new terms (including the replacement terms and the promoted synonyms) are listed as *Terms Added* on the following pages. Note that many of these terms will have been indexed prior to 2014 (typically as candidate terms), sometimes for several years, before they were added to Emtree.

Emtree Terms Changed in September 2014

44 terms (17 drug terms and 27 non-drug terms) from Emtree May 2014 have been replaced by 42 different terms in September 2014 (13 drug terms and 29 non-drug terms).

Of these, 28 terms (7 drug terms and 21 non-drug terms) are new (e.g. new generic names for drug chemical names) and have been assigned creation date 2014; the remaining 14 replacement terms (6 drug terms and 8 non-drug terms) were already present in Emtree.

10 drug terms were replaced by a non-drug term, no non-drug terms were replaced by a drug term. No preferred terms were deleted.

Changes are presented in alphabetical order of the *new* terms.
