Scopus

Your brilliance, connected

You want to request a correction and plan to submit a request to our support team. Here's what to expect.

Your query

Some of my information is missing or incorrect in my document(s)

⏱ ~21 working days

Some of my documents are missing

⏱ ~17 working days

My author profile is not accurate

⏱ ~7 working days

Two things to consider before you submit

☑ Check it's within Scopus' coverage

Scopus only indexes certain journals, books and conference titles — check the Coverage Guide first.
Content Coverage Guide

☑ Check the publish date

Articles published in the last 4 weeks may not yet be indexed — that's not necessarily an error. Wait a little before requesting a fix.

What happens next

You contact Scopus Support

Your request is evaluated by a Scopus specialist

Request in scope?*

Yes

Your request is forwarded to an appropriate service team

Corrections are made in the Scopus data

We send you a confirmation that the data has been corrected

The information is updated within the Scopus interface

No

We explain and close the request

** Sometimes, because of our curation policies, we can't make the change. Common reasons: (a) the title isn't currently indexed in Scopus; (b) the publication was too old.*

Note: if your request covers a lot of content — 10+ articles, an entire book, many book chapters, conference papers, or a full conference — it may take longer, and we'll update you.
