

Emtree Terms Added and Changed (May 2016)

This is an overview of new terms added and changes made in the second Emtree release in 2016.

Overall, Emtree has grown by 795 preferred terms (134 drug terms and 661 non-drug terms) compared with the previous version released in January 2016. In total Emtree now counts 73,922 preferred terms.

Because the terms added include replacements for existing preferred terms (which become synonyms of the new terms) as well as completely new concepts, the number of terms added exceeds the net growth in Emtree. Other changes could include the merging of two or more existing preferred terms into a single concept.

The terms added and changed are summarized below and specified in detail on the following pages.

Emtree Terms Added in May 2016

858 new terms (including 63 replacement terms and promoted synonyms) have been added to Emtree as preferred terms in version May 2016 (compared to January 2016):

- 146 drug terms (terms assigned to the Chemicals and Drugs facet).
- 712 non-drug terms (terms not assigned as Chemicals and Drugs).

The new terms (including the replacement terms and the promoted synonyms) are listed as *Terms Added* on the following pages. Note that many of these terms will have been indexed prior to 2016 (typically as candidate terms), sometimes for several years, before they were added to Emtree.

Emtree Terms Changed in May 2016

63 terms (12 drug terms and 51 non-drug terms) from Emtree January 2016 have been replaced by 63 different terms in May 2016 (12 drug terms and 51 non-drug terms).

Of these, 61 terms (10 drug terms and 51 non-drug terms) are new (e.g. new generic names for drug chemical names) and have been assigned creation date 2016; the remaining 2 replacement terms (2 drug terms and no non-drug terms) were already present in Emtree.

No drug terms were replaced by a non-drug term, no non-drug terms were replaced by a drug term. No preferred terms were deleted.

Changes are presented in alphabetical order of the *new* terms.
