Partner in Publishing

Amplifying Your Journal's Research

SSRN

Showcase Published Articles

SSRN is dedicated to the worldwide dissemination of research. While we aim largely to assemble, brand, & disseminate early scholarly research contributions, we also offer information providers the opportunity to submit & distribute accepted or published papers via our service known as Partner In Publishing (PIP).

SSRN's Partner In Publishing service showcases the historical & current research published by a journal. It enhances the brand, promotes the reputation, & expands readership. A PIP promotes both the reputation of the journal & the authors whose papers have been accepted. Showcasing the historical & current research published by the journal increases exposure, reaching a global interdisciplinary audience.

SSRN provides qualitative & quantitative metrics that go beyond downloads & citations. You have access to a customized dashboard that highlights the institutions that are reading & downloading your research as well as insights associated with the dissemination of your research via social media, blogs, news sources, & policy citations.

Increase Exposure

Share your research with our global interdisciplinary audience.

Build Your Brand

Promote the reputation of your journal & the authors whose papers have been accepted.

Expand Readership

Showcase the historical and current research published by the journal.

Targeted Metrics

Qualitative & quantitative metrics which track research consumption & measure impact by submission.
